

**Over 1,000 European stakeholders in Nutrition & Health came together for the 1<sup>st</sup> edition of NutrEvent on 17 and 18 June in Lille.**

**NutrEvent rose to its 1<sup>st</sup> challenge by bringing together over 1,000 stakeholders from the public and private sectors, coming from 21 countries, to develop new collaborative projects in research and innovation in Nutrition & Health on 17 and 18 June at Lille Grand Palais.**

June 17 | 18 2009  
Lille | France

The 1<sup>st</sup> edition of NutrEvent has fully met the targets set by its organizers – Nutrition Healthcare Longevity cluster, Eurasanté, Lille Grand Palais and Colloquium – by bringing together over 2 days and in one place, the companies and university researchers involved in research and innovation in Nutrition & Health.

NutrEvent managed to muster the key players in Nutrition & Health in Europe and beyond, since 21 nationalities were represented: France, United Kingdom, Ireland, Norway, Finland, Denmark, Belgium, Switzerland, Luxembourg, the Netherlands, Germany, Spain, Italy... but also Ukraine, Tunisia, the USA and Japan.

#### **NutriConference**

The two days were set in motion by a programme of top-level seminars during which **116 speakers** were able to present their works and innovations and review regulations and market trends in the ever-growing Nutrition & Health sector.

#### **NutriPartnering**

This business convention allowed **180 companies and research centres** to meet and share experiences... **500 rendez-vous** for as many future collaborative projects and partnerships!

#### **NutriCareer**

Whether they were researchers, young graduates or experienced job-seekers, **120 applicants** participated in the recruitment convention.

#### **NutrExpo**

The BtoB event brought together **90 exhibitors**.

NutrEvent substantiates the project which was initially and collectively carried by its partners: to create a new kind of event which would rightfully hold its own among the BtoB trade shows and conventions, bringing together the two spheres of science and industry.

With these results, NutrEvent has established itself at this time and for future shows, as the major Research and Innovation event in Nutrition & Health in Europe.
